STEAM ENCLOSURES

Precision Fit and Luxurious Designs

Steam shower units offer a luxury spa-like experience for any home and are available in select Series within the RODA Collection. The key ingredient for any steam unit is a precise, custom-fit and tight seal to lock in and retain steam, which is what BASCO does best.

A transom can increase the sense of elegance or drama for a custom shower enclosure - while also adding functionality to a steam unit. As a hinged panel of glass, typically above the door, a transom panel provides the ability to manually adjust or release steam levels.
